

Vernesha Jones

UX Designer

Big Rapids, MI | 404-576-3388 | vernesha33@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Motivated UX Designer and IT Support Specialist transitioning from a five-year career in auto insurance claims, bringing exceptional analytical thinking and customer service experience. Skilled in troubleshooting hardware and software issues, supporting end users across Windows and macOS environments, and documenting resolutions in ticketing systems. Adept at handling technical challenges with a strategic, user-focused approach and a commitment to timely incident resolution. Eager to contribute to a dynamic IT support team and continue growing through hands-on experience and professional development.

Skills

IT Support & Troubleshooting: Hardware/Software Diagnostics & Installation (Windows, macOS, iOS/Android), Mobile Device Management (MDM), Mobile OS Support (iOS/Android), Remote Desktop Support, Endpoint Security, Antivirus Software, Data Backup & Recovery, System Imaging & Backup Solutions

Networking: IP Addressing, DNS, DHCP, LAN/WAN Setup & Troubleshooting, Switches & Routers Configuration, Wireless Networking

Systems & Customer Support: Windows & macOS, Command Prompt, Help Desk Support, Ticket Resolution & Escalation, End-User Training, User Satisfaction, Documentation, and Knowledge Base Management

UX Design: User Research, Personas, User Flows, Journey Mapping, Wireframing, Prototyping, Usability Testing, Figma, Figjam

Research: Interviews, Affinity Mapping, Competitive Analysis, Heuristic Evaluation

Projects

NEXTSTOP - City Navigation & Transportation Mobile App

NextStop provides a clear, organized platform with a unique Traffic Radar feature that visualizes real-time congestion, enabling confident and efficient route planning.

- Designed an end-to-end mobile app introducing a new Traffic Radar feature to help urban commuters compare transportation options and plan efficient routes
- Conducted full-cycle UX research: interviews, affinity mapping, persona development, and insights synthesis.
- Created user task flows, sketches, wireframes, and high-fidelity UI for multi-modal transit (trains, buses, bikes, scooters)

SOLE BOUTIQUE - Sneaker E-Commerce Redesign

The Sole Boutique redesign introduces drop countdown timers, collaboration and release-type filters, sold-out recovery options, and purchase celebration screens, positioning Sole Boutique as a destination that respects sneaker culture.

- Redesigned an online sneaker retailer to compete with platforms like Nike SNKRS, StockX, and GOAT. Shifting from a generic e-commerce experience to a collector-focused destination.
- Conducted full cycle UX research: heuristic evaluation, competitive/comparative analysis, interviews, card sorting, and usability testing
- Created user task flows, sketches, wireframes, and high-fidelity UI for drop calendars, collaboration filters, and sold-out recovery paths
- Performed usability testing and iterated on product discovery, checkout flow efficiency, and release-day purchase experience

SHAZAM REDESIGN - Music Discovery Experience Redesign

The Shazam redesign transforms the post-identification moment into a discovery experience with personalized recommendations, in-app listening, and contextual content that gives users a reason to stay and explore.

- Redesigned Shazam's post-identification experience to solve the "identify and bounce" problem, where users leave the app within seconds of identifying a song
- Conducted full cycle UX research: interviews, affinity mapping, journey mapping, competitive analysis, and insights analysis
- Created user task flows, sketches, wireframes, and high-fidelity UI for personalized discovery feeds and in-app listening integration
- Performed usability testing and iterated on post-identification navigation, content discovery, and music exploration patterns
- Delivered a cohesive UX case study articulating the problem space, solution rationale, and design decisions.

Netflix Watch Party - Companion Mode Streaming Feature

Netflix Watch Party is a native companion mode with one-tap setup, voice chat, and shared reactions, leveraging users' natural dual-screen behavior to recreate the feeling of watching together.

UX/UI Designer • *Figma, Figma*

- Designed a native companion mode feature enabling Netflix users to watch content together remotely with synchronized playback, voice chat, and real-time reactions
- Conducted full cycle UX research: interviews, affinity mapping, persona development, journey mapping, and insights synthesis
- Created user task flows, sketches, wireframes, and high fidelity UI for a cross-device experience (mobile, TV)
- Performed usability testing and iterated on party creation flow, invite mechanics, and companion mode interaction patterns

Education

Adobe Digital Academy x General Assembly | **UX Design Bootcamp** | 2025 – 2026

Per Scholas | **IT Support, CompTIA A+ & Google IT Support Certifications** | 2025

University of Michigan-Ann Arbor | **Bachelor's in Biopsychology, Cognition Neuroscience**

Professional Experience

Root, **Auto Damage Appraiser** | *Columbus, OH*

10/2024 - 03/2025

- Conducted virtual assessments and remote troubleshooting for auto claims, accurately processing approximately 8 estimates per day using internal systems.
- Maintained clear documentation of repair evaluations and customer communications, improving case traceability and resolution speed.
- Coordinated rental reservations and service timelines using Entegral, reducing claim cycle time and delays.
- Applied critical thinking to evaluate complex data and resolve claim-related issues within policy and compliance standards.

Progressive Insurance, **Managed Repair Representative** | *Grand Rapids, MI*

08/2022 - 10/2023

- Performed in-person and virtual inspections, documenting vehicle damage and initiating case workflows in proprietary systems.
- Maintained accurate records of repairs and payments, contributing to streamlined ticket resolution and audit readiness.
- Communicated with external vendors and clients to resolve technical repair questions and expedite claim processes.
- Participated in monthly audits, consistently meeting 80%+ accuracy in documentation and data validation.

2B Claims, **Claims Specialist-Total Loss** | *Atlanta, GA*

07/2021 - 02/2022

- Supported clients through policy explanation, system navigation, and technical claim documentation in a high-volume environment.
- Processed claim payments using digital systems, ensuring timely case progress and accurate data input.
- Evaluated insurance coverage data to troubleshoot discrepancies and support resolution planning.

State Farm, **Claims Adjuster- Auto ILR** | *Dunwoody, GA*

02/2019 - 07/2021

- Managed high volumes of claims through internal systems to dramatically improve case data accuracy and regulatory compliance.
- Resolved customer concerns with empathy and technical clarity to measure impactful improvements to satisfaction metrics.
- Delivered status updates through ticketing queues, and investigated and documented incident details using structured forms and digital workflows.
